

Central Florida Offshore Anglers
P.O. Box 607459
Orlando, Florida 32860

The CFOA Marine Foundation is a 501(c)(3) non-profit organization that supports the development of fishing activities for youth, home-town heroes and wounded warriors, the construction of artificial reefs, and the advancement of marine research for sustainable fisheries.

The Marine Foundation and its parent organization, the Central Florida Offshore Anglers, hold two open-to-the-public fundraising events each year, – an auction and offshore tournament. Last year, through the generous donations from our sponsors, these events helped to fund the creation of a new artificial reef off Port Canaveral, support Dolphin Tagging research, the Edgewood Children’s Ranch, Guide’s Trust (The Keys) and Great Oaks Village for Children.

We held our 33rd annual fishing tournament in June. We are preparing for the annual auction that attracts hundreds of fishing enthusiasts. The event will be held on November 5th in Orlando.

You can help us support these worthwhile programs through your tax deductible donation of products, or services for our annual auction. Your donation can be mailed/shipped to Gean Olin, CFOA Treasurer, 1784 Nordic Court, Apopka, Florida 32712. For additional information or to arrange pickup of your products in Central Florida, please contact Auction Chair Scott Sampson at 407-415-0086 or Bill Walker at 407-782-0987. You can also contact us at donations@mycfoa.com.

Please include your brochures, catalogs, business cards and logo with your donation. They will be displayed at the auction, our monthly meetings, and throughout our advertising and social media campaign. Your logo will be added to the first page and sponsors section of our website which will hyperlink directly to your website to provide readers with easy access to your products or services. Our website is mycfoa.com.

Thank you for your continued support. We look forward to a successful auction and partnership throughout the coming year.

Sincerely,

Rodney Sahr, CFOA President
